## Premier Paint Protection II

Much like a good sunscreen protects our skin, paint protection shields a vehicle's valuable paint surface from dangerous ultraviolet rays. Equally important, paint protection creates a protective barrier that shields the paint from environmental hazards. Many environmental agents can permanently damage painted surfaces: industrial fallout, acid rain, tree sap, bird droppings and road salt. Appearance-wise, paint protection brings out and maintains the depth and luster that is within every professional paint job.

Applying wax and polish to your car takes time and energy. Detailing Centers are expensive and apply oily, sub-par wax products. Why go through the extra effort and cost when there is a better alternative? The Auto Butler Premier Paint Protection II system gives you the protection you need and the shine you want - GUARANTEED!

The Auto Butler program seals and protects your vehicle's painted surface by coating it with a protective barrier that can be cleaned and restored time after time to provide a beautiful, long-lasting finish that will be easy to maintain for many years to come.

The Premier Paint Protection II system uses two steps to protect your vehicle's finish. First, we clean and shine the surface of the vehicle preparing it for step two - a second coat that provides a tough shield against the environmental hazards that can destroy your car's showroom finish. And to complete the package, Auto Butler is backed by a comprehensive warranty.

Auto Butler's two step reapplication program protects your new car's finish for years to come. We even send you reapplication reminders to be sure that your car never misses a beauty appointment!

You have two options to choose from:

- Nine reapplications over five years
- Five reapplications over three years

The Auto Butler program is a convenient, cost-efficient method to protect your vehicle's painted surface and keep your vehicle looking showroom new.

## Interior Protection

Auto Butler interior protection takes the worry out of maintaining fabrics, leather and upholstery. When professionally applied, fabric protection thoroughly coats every fiber and thread of the vehicle's fabric including the seats, seat backs and

carpets. More than merely water repellent, the tough coating prevents stains from coffee, soft drink, milk and other water or oil based liquids. Fabric protection also prolongs fabric life by reducing "thread-on-thread" abrasion from dirt particles trapped between the fibers that make up the cloth.

Leather Protection is professionally applied to form an invisible barrier against the sun's ultra violet rays, dirt and liquids. The product protects leather surfaces against fading and cracking while allowing the surfaces to breathe naturally. Auto Butler's Leather Protection will be reapplied every 6 months for the life of the warranty.

"Do-it-yourself" products are water based, evaporate or rub off quickly, and do not include a warranty. Our professionally applied products last for years and include a warranty that protects your investment and gives you peace of mind.
